

INDOOR ARENA PROJECT

Become a Part of Something Big!

Since our opening in 2017, Courage Rock Stable has established itself as a PATH International (Professional Association of Therapeutic Horsemanship) member and the only center of its kind in the area.

Courage Rock Stable is home to over seventy clients and volunteers that use our equine assisted programs for their own needs or in support of others. Clients working with the horses is beneficial for those with physical or emotional concerns and improves confidence, strength, balance and independence.

Courage Rock was created to specifically offer services to veterans and their families with no charge to them. We have since opened this service to first responders free of charge. We also offer therapeutic riding to persons with handicaps or disabilities while still focusing on our veterans' programs. We hope to expand our programming for others like, at risk youth, reading encouragement, mental, occupational, and physical health.

Benefits to having an indoor arena could allow us to operate six days a week all year without shutting down due to inclement weather. It would provide more privacy for clients to focus and have a safer environment. Having the wheelchair accessible ramp indoors will give our clients the privacy needed to mount their horse. The arena will provide a calm and comforting atmosphere especially to those with PTSD (Post Traumatic Stress Disorder), anxiety and TBI (Traumatic Brain Injury) affiliated with military combat and/or work-related trauma. Horses need year-round exercise and training and having the ability to exercise the horses year-round ensures their best health in a stress-free environment.

Would you please consider sponsorship to help build this indoor arena!
